

COMBINED PRODUCT CATALOGUE

Restructured by Industry & Operational Need

02 FOOD & BEVERAGE CLEANING SOLUTIONS

Protecting What Goes on the Plate, From Line to Label

Complete hygiene programmes for food and beverage processors, dairy operations, bottling plants, and packaging facilities — from CIP closed-system cleaning through sanitisation, production floor care, staff welfare, and kitchen operations.

CIP — Closed Systems: Alkaline Cleaners

Clean internal surfaces of process equipment, pipework, and tanks without dismantling them.

Product	Application & Best For
MK Sol Plus	Highly concentrated alkaline CIP cleaner specifically designed for heated systems such as UHT processing equipment. Best for: UHT systems Heated CIP surfaces Protein and scale removal Various water conditions
MK Sol Main	Alkaline CIP cleaner for standard pasteurisation systems. Breaks down scale, fats, proteins, and other residues. Best for: Standard pasteurisation systems Milk processing Bottling plants Non-foam CIP

CIP — Closed Systems: Acid Cleaners

Dissolve milk stone and mineral deposits after the alkaline cycle.

Product	Application & Best For
Nitracid Plus	Powerful dual-action acid CIP cleaner for UHT systems. Dissolves stubborn milk stone deposits in heated transfer tubes. Best for: UHT systems Milk stone removal Post-alkaline neutralisation

Product	Application & Best For
Nitracid Main	Acid CIP cleaner for standard pasteurisation systems. Dissolves milk stone deposits in heat exchanger pipes and holding tanks. Best for: Standard pasteurisation Low-temperature acid wash Post-alkaline system reset Heat exchangers

CIP — Open & Closed Systems

Flexible CIP and COP solutions for beverage, bottling, wine, fruit processing, and general food production.

Product	Application & Best For
MK Sol 505	Non-foam alkaline cleaner for automatic and semi-automatic CIP units in beverage, wine, fruit processing, and industrial bottling operations. Best for: Beverage and bottling plants Sugar and carbonation deposits Auto and semi-auto CIP units
MK Sol 105	Cost-effective CIP and COP cleaner for single-step daily cleaning of processing lines and collection tanks. Best for: Daily CIP and COP cleaning Processing lines Collection tanks Cost-effective operations
Nitracid 305	Cost-effective acid cleaner for single-step cleaning of processing and collection tanks. Best for: Milk stone and mineral deposit removal Single-step acid cleaning Post-alkaline neutralisation

Sanitisation & Sterilisation

Reduce harmful microorganisms on equipment surfaces and in processing systems to levels safe for food production.

Product	Application & Best For
Oxyplus Active	High-performance peracetic acid sanitiser and steriliser for CIP sterilisation in closed processing systems. Best for: CIP sterilisation Closed systems Strict hygiene environments Residue-free surfaces
Oxyplus FG 100	Powerful peracetic acid-based sanitiser delivering rapid, effective microbial control across a wide range of bacteria, viruses, and pathogens. Best for: Open and closed CIP systems Equipment disinfection Surface sanitation Sensitive production environments
Oxyplus FP50	Hygiene solution specifically designed for entry-point footbaths at the doors of controlled or sensitive production areas. Best for: Entry-point footbaths Dairy Food processing Poultry farms Pharmaceutical facilities
Hydrogen Peroxide 35%	Widely used in dairy and milk processing for disinfection and sterilisation of equipment and packaging. Best for: Dairy and milk processing Equipment and packaging sterilisation Non-staining 35% strength

Product	Application & Best For
Hydrogen Peroxide 50%	Higher-strength hydrogen peroxide for intensive disinfection and sterilisation requirements. Best for: Dairy and milk processing Equipment and packaging sterilisation Non-staining 50% strength
Ajexi Guard	Food-safe disinfectant certified for water treatment. Safe for direct use on fruits and vegetables to eliminate surface bacteria. Best for: Food-safe applications Domestic and industrial use Water treatment Produce sanitation

Crate & Line Washing

One-step cleaning and disinfection for production lines, crates, and containers.

Product	Application & Best For
Zadipol	Low-foam powder cleaner and disinfectant for line cleaning and crate washing in food and horticultural operations. Effectively eliminates bad odours from production lines, crates, and containers in a single step. Best for: Line and crate washing Horticultural farms Food processing One-step clean and disinfect Bad odour elimination
Stazed	High-foam powder detergent with built-in disinfection power for heavy-duty cleaning in food and beverage environments. Best for: Food processing lines Crate washing Heavy soiling Combined cleaning and disinfection

Hard Surface, Floor & Drain Care

Maintain production floors, equipment surfaces, and drainage systems to food-safe standards.

Product	Application & Best For
Supar 100	Non-foam floor degreaser that removes greasy marks, heavy traffic stains, and ground-in dirt from industrial floors. Best for: Industrial floors Traffic mark removal Grease prevention Non-foam formula
Starkleen	Powerful scale and stain remover for hard water buildup, mineral deposits, and tough surface staining. Best for: Hard water scale Mineral deposits Surface stain removal Equipment and pipes
Starkleen Stripper	High-strength acidic cleaner for heavily stained floors with deep metal marks and reddish discolouration. Best for: Heavily stained floors Metal oxide marks Deep stain removal Acidic formula
Florex-San	Gentle floor cleaner and disinfectant for polished stone and cement floors. Best for: Polished stone floors Cement surfaces Safe disinfection Long-term floor care
Stazed 100	Fast-acting drain cleaner that clears blocked drains caused by fats, oils, and industrial waste. Best for: Blocked drains Fat and oil buildup Industrial waste removal

Kitchen & Staff Canteen

Keep staff kitchens and canteen facilities hygienic and audit-ready.

Product	Application & Best For
Micro Wash	<p>Low-foam detergent formulated for automatic dishwashing machines in institutional and commercial kitchens.</p> <p>Best for: Institutional kitchens Hotels Catering Safe on glass, plastic, and stainless steel Dishwasher wash cycle</p>
Micro Rinse	<p>Fast-acting rinse aid dosed automatically at the final rinse stage.</p> <p>Best for: Institutional kitchens Hotels Catering Use with Micro Wash Dishwasher rinse cycle</p>
Oven Master	<p>Powerful thick-gel oven and kitchen degreaser that dissolves baked-on grease and carbon deposits from cookers, frying pans, and heavily soiled cooking surfaces. The gel formula clings to vertical and angled surfaces for maximum contact time and deep penetration.</p> <p>Best for: Cookers and ovens Frying pans Kitchen hoods Gel formula for superior surface adhesion</p>
Oven Spray	<p>Powerful liquid spray oven and kitchen degreaser formulated specifically for hard-to-reach and inaccessible areas where a gel cannot penetrate. Delivers the same heavy-duty degreasing action as Oven Master — dissolving baked-on grease and carbon deposits deep inside enclosed ovens, extractor hoods, and enclosed cooking cavities without dismantling equipment.</p> <p>Best for: Hard-to-reach oven cavities Extractor hoods Enclosed cooking surfaces Liquid spray format</p>
Britto Dip	<p>Stain-removing soaking powder designed to lift stubborn stains from cups, mugs, tea kettles, and coffee makers.</p> <p>Best for: Cups and mugs Tea and coffee equipment Beverage stain removal Hotels and canteens</p>
Bio Rinsola Extra	<p>All-purpose cleaner that removes stubborn grease and grime from kitchen surfaces and equipment.</p> <p>Best for: Kitchen surfaces Grease and oil removal Hand and machine washing Multi-purpose use</p>
Stazed	<p>High-foam powder detergent with built-in disinfection power for heavy-duty cleaning in food and beverage environments.</p> <p>Best for: Kitchen surfaces Food processing environments Combined cleaning and disinfection Heavy soiling</p>
Ajexi Guard	<p>Food-safe disinfectant certified for water treatment. Safe for direct use on fruits and vegetables to eliminate surface bacteria.</p> <p>Best for: Food-safe applications Domestic and industrial use Water treatment Produce sanitation</p>
Bio Lino Avino	<p>A powerful chlorine-based cleaner and disinfectant whose active chlorine chemistry delivers fast, broad-spectrum microbial control on contact. Formulated for food, beverage, and clinical processing environments, it cuts through fats, proteins, oils, and surface contamination while simultaneously disinfecting — eliminating bacteria, viruses, and pathogens in a single step. The chlorine base also neutralises bad odours, making it the complete one-step hygiene solution for facilities that demand uncompromising standards.</p> <p>Best for: Food and beverage processing Clinical environments One-step chlorine-based degreasing and disinfection Processing equipment and surfaces Odour neutralisation</p>

Laundry — Workwear & PPE

Industrial-grade laundry solutions for food-processing workwear, aprons, and protective clothing.

Product	Application & Best For
Britto Dose Plus	Heavy-duty low-foam liquid detergent for healthcare facilities and food industry operations. Best for: Healthcare facilities Food industry laundry Heavy soiling Main wash cycle Automatic dosing
Britto Power Plus	Heavy-duty powder detergent with oxygen bleach built in. Best for: Heavy soiling Machine wash only
Top Wash 605	Concentrated alkaline liquid wash booster for heavily soiled, greasy, and stained fabrics. Best for: Heavily soiled fabrics Greasy and stained workwear Machine wash only Automatic dosing
Pera Plus	Dual-action oxygen bleach — stain removal and disinfection in a single dose. Best for: Coloured and white workwear Combined bleaching and disinfection Bleach stage Automatic dosing
Ajexi 6	Concentrated chlorine bleach and disinfectant for white workwear. Best for: White workwear Clinical disinfection Pre-wash soak or dosing Concentration: 6%

Spotters

Dedicated spot treatments for stains that survive the main wash.

Product	Application & Best For
Perkol Ink Go	Targeted stain remover that eliminates ink, lipstick, and other oil-based stains that survive the main wash. Best for: Ink, lipstick, oil-based stains Spot treatment
Perkol Soot Go	Removes soot, smoke residue, and heavy carbon staining from fabric. Best for: Soot, smoke, carbon stains Spot treatment
Perkol Rust Off	Targeted stain remover applied after washing to lift rust marks from both white and coloured fabrics. Best for: Rust stains Post-wash spot treatment White and coloured fabrics
Perkol Flush 1620	Versatile heavy-duty stain remover that tackles a wide range of problem stains in one treatment — including yellowing, dullness, and stubborn red soil. Best for: Yellowing Dullness Red soil Wide-range staining Soaking and boosted wash
Perkol Strip	Powerful brightening agent available in powder and liquid form. Removes detergent buildup from over-washed linen and restores fabrics to a bright, clean appearance. Best for: Dull or over-washed linen Machine or hand wash Available as powder and liquid

Hand and Body Hygiene

Protect all production line workers at every hygiene station with reliable, skin-safe hygiene products at every point of need.

Product	Application & Best For
Handex Cream	Gentle hand washing cream that kills germs while keeping skin soft and protected. Available in a variety of colours. Best for: Factory washrooms Daily hand hygiene Skin protection Available in a variety of colours
Handex Dry	Alcohol-based hand sanitiser that eliminates germs on contact. Dries almost instantly — no water or towel needed. Best for: On-the-go sanitisation No-rinse hygiene Alcohol-based
Handex Body Gel	Mild yet effective pH-balanced body wash formulated for daily use in institutional shower and welfare facilities. Gently cleanses and conditions skin while providing reliable germ-killing protection — ideal for high-turnover environments where worker welfare and hygiene compliance go hand in hand. Available in a range of fragrances to suit facility preferences. Best for: Worker welfare showers Factory and site facilities Daily personal hygiene Skin-safe formula Available in a range of fragrances

Drainage

Prevent costly blockages and maintain hygienic, odour-free drainage in food and beverage production environments.

Product	Application & Best For
Stazed 100	Fast-acting drain cleaner that clears blocked drains caused by fats, oils, and industrial waste. For a complete drainage hygiene solution, use Stazed 100 to unblock, then follow with Bio Lino Avino to disinfect and eliminate bad odours — leaving drains flowing freely and hygienically sound. Best for: Blocked drains Fat and oil buildup Industrial and kitchen waste removal Powder formula Combined with Bio Lino Avino for full-drain hygiene
Bio Lino Avino	Chlorine-based disinfectant cleaner applied post-unblocking to eliminate residual bacteria, pathogens, and bad odours from drain channels and surrounding surfaces. Ensures drains remain hygienically clean after Stazed 100 clears the blockage. Best for: Post-unblock disinfection Drain odour control Chlorine-based sanitation Drain channels and surfaces
